

SMS Service

SMS is an innovative service to allow the documental integrity check on full containers conceived to optimise the haulier flow to the terminal.

The service consists in sending an SMS message to the n.er +393316166446. The message has to be composed by the text "PRE" followed by the full container id and number.

Ex : PRE XXXX000000

Once the system receives the message, it will make a prompt check of the container status and an answer back is sent to the requesting number.

Hereafter is the list of the possible answers and their explanation:

Answers to inform the haulier there are some problems to be solved before delivery or withdraw of the full container can be carried on.

Esce via Nave	the container is already into the terminal and in loading list
Atteso	has not arrived yet but it is on vessel discharging list
Non atteso	container has not arrived and it doesn't have any active entrance booking container has not arrived and vessel is not open container is at entrance
Non Ritirabile	container is into the terminal but blocked, it can't exit container is into the terminal but without Delivery Order container is into the terminal but withdraw is not allowed
Bdc Scaduto	delivery date expired

Answers informing the haulier that full container is available for delivery or withdraw

Prenotato	Export: booking registered, vessel is open Import: container has been discharged and it is available for withdraw
